# Getting Started with ColorGATE

Thank you for purchasing our high-performance RIP software. This guide will lead you through the first steps with your ColorGATE product. It is viable for the following printing software products:

- ColorGATE Productionserver 23 (including Ceramic, Décor, Packaging and Textile Productionserver)
- ColorGATE Proofgate 23
- ColorGATE Filmgate 23

We wish you a lot of success working with our software.

Your ColorGATE team

# About Our New Licensing Model

There are three different license types available for ColorGATE's version 20 software products:

- , L
- Single Host License / Software (SHL-SW): Software-based license for use on a single computer. The software is activated with an activation code that binds the license to the respective computer via the ColorGATE license server. There are two ways to operate an SHL-SW license:
- Online mode (recommended): You can transfer your software to another computer yourself at any time and perform license updates yourself.
   The RIP computer must have a permanent internet connection (during license activation and while using the ColorGATE software).
- Offline mode: You can activate your license once and use the software only on the RIP computer used for this purpose.

The computer only needs to be connected to the internet for license activation and can be offline while working with the ColorGATE software.

If you want to update your license or transfer it to another computer, you must first switch to online mode. For detailed instructions on how to switch from offline to online mode (and back again) and what to consider in offline mode, please refer to our **blog entry**.

Multi Host License / Software (MHL-SW): Software-based license for use on multiple computers. MHL-SW licenses use an additional tool, the Floating License Manager (FLM), for license management via the local network.

**Single Host License / Hardware (SHL-HW)**: Hardware-based license for use on a single computer. The license is verified by a USB dongle and a key file.

## Which license type do I have?

- If you received a USB dongle, you have a Single Host License / Hardware (SHL-HW).
- If you did not receive a USB dongle, you have a software-based license.
  - If your license is intended for use on a single computer, you have a Single Host License / Software (SHL-SW).
  - If your license is intended for use on **multiple computers**, or on a computer that has no internet access, but can access a server running our Floating License Manager over local network, you have a **Multi Host License / Software (MHL-SW)**.

This document covers the installation and activation with a **Single Host License / Hardware**. If you have acquired another license type, please refer to the respective guides. You can download them from <a href="https://www.colorgate.com/support/en/support/manuals">https://www.colorgate.com/support/en/support/en/support/en/support/en/support/en/support/manuals</a>.

# Upgrading to Version 23 from a Previous Version

If you are upgrading to version 23 from a previous version, we recommend that you first install the latest build of the already installed version. You can download it from

https://www.colorgate.com/support/en/download. Click the button SOFTWARE, then activate the respective filter for Productionserver / Filmgate/Proofgate and select the required version (Login required).

Then, perform a backup of your system configuration. You can find detailed instructions on how to do this on our **blog**. After that, you can install version 23 and import your backup.

**Note**: With a V23 license you can run V23.00 as well as the latest builds of Versions 10 to 22. Starting with builds:

- 10.34.8852,

- 20.01.9222,

-21.10.11562,

- 22.10.14158 there are compatibility with V23 licenses. The corresponding hotfix builds are available in the Service Service & Support Area of our website under **DOWNLOAD AREA > SOFTWARE**.

Multiple versions of the software (e.g. V23 and V22.10) can be installed side by side on the same system without any problems and can be operated alternately. When you change between these installations and switch to a version prior to 22.10, it is necessary to start the alternate version with administrator privileges.

# System Requirements

## **Operating systems (64-Bit)**

- Microsoft Windows 10 (Pro, Enterprise)
- Microsoft Windows 11
- Microsoft Windows Server 2016
- Microsoft Windows Server 2019 (For optimal performance we recommend Microsoft Windows 10 / 11)
- Apple Mac devices with ARM-based processors (M1 chips) are not supported. On Intel-based Macs, Productionserver can be used in conjunction with a hardware dongle and Parallels Desktop.

## Hardware

#### Minimum hardware requirements:

- CPU: Intel Core i3-2100 / AMD Athlon II X2 340
- RAM: ≥4 GB
- Free disk space: 120 GB
- Display resolution: 1280 x 1024

#### Recommended for using one printer:

- CPU: Intel i5-7500 / AMD Ryzen 5 1600 or newer
- RAM: ≥8 GB
- Free disk space: 120 GB SSD
- Display resolution: 1920 x 1080

#### Recommended for using multiple printers:

- CPU: Intel i9-9900K / AMD Ryzen 7 3800X or newer
- RAM: ≥16 GB
- Free disk space: 512 GB NVME
- Display resolution: 1920 x 1080

## Installation and operation

- LAN adapter, TCP/IP required for network connection
- USB port for the hardware dongle

# Supported interfaces (depending on used printers, measuring devices and cutting plotters)

Ethernet, TCP/IP, USB, FireWire

### Use in virtualized environments

If the virtualization solution supports USB, ColorGATE software can usually be operated with hardwarebased licenses. Please note, however, that ColorGATE cannot provide support for problems that occur in the context of the virtualization solution. There may be restrictions when printers, measuring devices or cutting plotters are connected via USB. In addition, the hardware requirements must be exclusively available as resources for the virtual machine to ensure a high-performance operation of the software. For these reasons, we recommend using virtualized environments for testing purposes only.

# Registration

In order to use your software, you must create a user account in the Service & Support area of our website and register the product there. Afterwards, you will be able to activate it.

As long as you have not registered and activated your product, you will receive a request for product registration every time you start the program. Without product registration and activation, the program cannot be opened anymore after the trial period has expired.

As a registered user you also have access to the websupport system and the download area, where you can download software updates, MIM packages with ICC profiles and technical documentation for your software.

## **User Registration**

- 1. Go to https://www.colorgate.com/support/en.
- 2. Click LOGIN / REGISTER to get to the site https://www.colorgate.com/support/en/user-login.
- 3. Click **REGISTER NOW**.
- 4. An assistant will guide you through the next steps.

You can now register your product.

# **Product Registration**

- 1. Go to https://www.colorgate.com/support/en.
- 2. If you are not logged in to your user profile, click LOGIN / REGISTER to log in using your email address and password.
- 3. In the menu, select ACCOUNT & REGISTRATION > Product Registration.
- 4. The **PRODUCT REGISTRATION** page is displayed.
- 5. An assistant will guide you through the next steps.

We will now check your details and send you an email notification within the next two days that your permanent license file is available for download on the web server. This file will allow you to activate your product.

# Installation

**Prerequisite:** Plug the dongle into a USB port before you start the installation. It must remain plugged-in to operate the program.

- Download the software installer. You can find it on <u>https://www.colorgate.com/support/en</u> > DOWNLOAD AREA > SOFTWARE (Login required).
- 2. Open the Installer and follow the instructions.
- 3. In the License Type Selection step of the installation, select Single Host License / Hardware (SHL-HW). Click Next and follow the instructions to complete the installation.
- For certain printers, you may need to install additional software components such as halftoning modules. You can find them on <u>https://www.colorgate.com/support/en</u> > DOWNLOAD AREA > SOFTWARE > Printer-Related.
- 5. If the printer is operated via USB: Install the printer driver provided by the manufacturer.

You have successfully installed the software.

# Activation

After you have completed the product registration and have installed the software, you must activate the software the first time you start the program by downloading the license file and coupling it with your dongle.

## **Online Activation**

1. Start the software. A dialog opens that allows you to open the Keyupdate tool. If it does not start automatically, start Keyupdate.exe manually:

C:\Program Files (x86)\ColorGATE Software\Productionserver23

2. In Keyupdate, click Download License File to load the license file from the web server.

<b>%</b> KeyUpdate v20.00.9174	×
Attached Dongle License Number: 8459 License information cannot be shown, because the current license file is missing. Nevertheless, the dongle update can be performed as usual. Press Read Attached Dongle' to obtain the license file.	License File License Number: Version: Product: Limit License: Software Maintenance:

Attached dongle can be updated				ACM Tools	End Program

The license file is now coupled to the dongle. The software can now be used without restrictions.

# **Support Options**

## Online Help

In the software, you can open the online help by pressing the key F1.

## Value Pack

The Value Pack is a maintenance and support contract available with all ColorGATE software solutions. It includes all updates and upgrades as well as access to technical support.

More information can be found at <u>https://www.colorgate.com/service-support/resources/value-</u>packs.

## **ColorGATE Sales Partner**

Your dealer is your first point of contact for support requests.

## Web Support

Note: Please note that our web support is only available with a valid Value Pack.

If your dealer is unable to help you, our web support is at your disposal. You can create web support tickets via the Service & Support area of our website or directly in the software. For detailed instructions on how to do this, please refer to our **blog entry**.

- For creating web support tickets open <u>https://www.colorgate.com/support/en</u> and log in with your personal login credentials. Via MENU > SUPPORT > Web Support you can create a web support tickets.
- For creating web support tickets directly in the software click Help > Web tickets... Then click Login with your ColorGATE account credentials and enter your access data.
